## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on 08/12/05 is acknowledged. The traversal is on the ground(s) that see the paper reply. This is found persuasive and therefore the election/restriction requirement filed on 08/05/05 is withdrawn.

However, a new election/restriction requirement is implied in this office action.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 22-26 are drawn to an external cavity optical transmitter, classified in class 372, subclass 101.
- II. Claims 12-21 are drawn to a method of tuning an external cavity optical transmitter, classified in class 372, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group II can be used to tune the external cavity optical transmitter. The

subcombination has separate utility such as Group I is used to control the laser beam of the external cavity optical transmitter.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
